

End-to-end cash management from
Tellermate and DTS Connex[®]

 Tellermate with  **DTS**
CONNEX[®]

Introducing a partnership with Tellermate Touch cash counter and DTS Connex®

Tellermate works in partnership with DTS Connex® to create a closed-loop cash management solution for your business at a fraction of the price of cash recyclers or smart safes.

Cash management remains a crucial activity for retailers, restaurants, and banks across America. In fact, any business that takes cash payments knows how important it is to streamline their cash handling in order to drive efficiency and reduce unnecessary operational costs.

As pioneers in count-by-weight technology, Tellermate has partnered with cash management software provider DTS Connex® to develop a closed-loop solution to help your business get full visibility of your cash from the point of sale to the bank. Here's how...

1. Cash is accepted at the point of sale. Then, during shift changeovers, or at the end of day, a Tellermate Touch cash counter is used to quickly and accurately reconcile the cash in under 60 seconds.
2. The Touch's connectivity enables deposits, capturing cash count, bag and posted date data with barcode printing (1D or 2D), to be sent directly to the DTS Connex Deposit interface. This eliminates manual input errors and wasteful paper-based audit trails.
3. Locations create deposits and place change orders using standardized and controlled processes in DTS Connex®. The system is designed to work with any courier or bank.
4. As transactions are transported by the courier and processed at the bank vault, status updates are passed to DTS Connex® creating a comprehensive end-to-end audit trail.
5. Change orders are then shipped to the store and the process starts all over again. DTS Connex® reporting, notifications, and analytics increase corporate oversight and control, reduce errors, and accelerate the issue resolution process.

"Tellermate, in conjunction with DTS Connex® can solve a number of your operational pain points. It all starts with our intelligent cash counters"

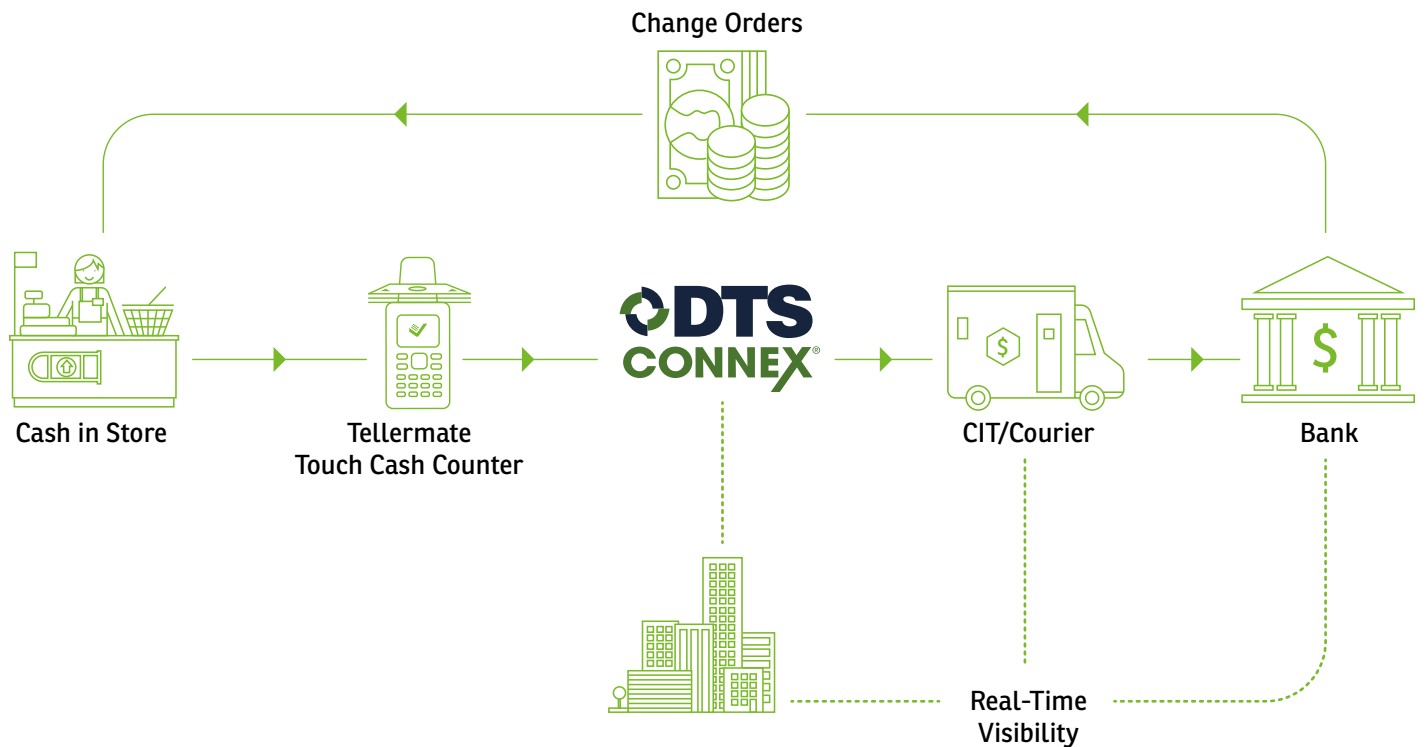

See it in action!

Tellermate and DTS Connex® will save your business time and money

With Tellermate and DTS Connex®, your business gets full visibility of your cash every step of the way. Our solution streamlines your cash-to-bank process saving you both time and money.

A simple solution

Choose Tellermate and DTS Connex® to simplify your cash-to-bank process. We'll help you minimize errors, reduce unnecessary costs, and get better visibility of your cash as it moves in, around and out of your stores. Plus, with our range of hardware and software packages, you'll be able to select the solution that's perfect for your business.

Benefits to you:

- Increased deposit accuracy
- Removes the need for a local PC to manage deposits
- An end-to-end solution at the fraction of the price
- Provisional credit from national banking partners
- Real-time visibility of the cash across your business

A global leader in cash management

Tellermate is a leading provider of cash management solutions to the retail, grocery, food service and financial industries, deployed across numerous Fortune 500 companies.

Tellermate founded count-by-weight technology in the cash management industry back in 1979. To give you an idea of scale, our technology processes over £2billion daily!

UK headquarters are home to the engineering, research & development, marketing, and executive teams. National offices are located in Atlanta, Paris, Heidelberg, Barcelona and Tokyo.

Tellermate's mission is to improve the profitability of our customers by providing next generation end-to-end cash-management solutions, from innovative software to connected cash-counting products.
